

Strumen[®] TRIO VET

New Generation Chemo Sterilant

FOR EXTERNAL USE ONLY

Composition:

Each 100 ml contains:

Glutaraldehyde Solution USP	15 % w/v
Didecyl dimethyl Ammonium Chloride	5 % w/v
Formaldehyde Solution IP	15 % w/v
Aqueous base - Q.S or Purified water USP	QS

For Terminal Disinfection

Antimicrobial Activity :

It is a chemo sterilizer with proven efficacy against all types of microorganisms including bacterial spores, virus, fungi, Chlamydia, molds & yeast. Didecyl Dimethyl Ammonium Chloride damages the cell membrane of the microorganisms and alters membrane permeability leading to leakage of the vital cellular components. Following disruption of cell membrane, formaldehyde and glutaraldehyde gain entry into the cell and causes irreversible destruction of cytoplasmic organelles and finally kills the cell.

Salient Features :

- **Strumen TRIO VET** is a unique combination having synergistic action against all types of microorganisms including bacteria, virus, fungi, molds, chlamydia etc.
- **Strumen TRIO VET** highly used for terminal disinfection in empty sheds, hatchery, vehicles etc.
- Non-corrosive and Rapid action.
- Can be used at low concentrations.
- Effective over a longer period of time.
- Non toxic to animals and non staining.
- Cost effective.

Dosage & Application method:

Empty shed for terminal disinfection: 7 ml per 1 litre water spray with high pressure equipment. (Spray 1 litre diluted disinfectant per 25 sq. ft. area.)

Vehicles : 7 ml per 1 litre water - spray with high pressure

Hatcher and setter: 7 ml per 1 litre water - spray and mop

Consult your field staff/your aquaculture specialist for specific usage and directions.

Precautions:

- Do not use along with other alkalies, soaps and detergents.
- Avoid direct exposure to sunlight.
- Avoid direct contact with eyes and skin.
- If contacted, flush immediately with clean water.

Storage: Store in cool dark place.

Available Packs: 1Ltr & 5 Ltr
